E-permitting survey and regional informational meetings

The consulting firm, Willamette Consulting / Eclipse Solutions, hired by the division study e-permitting solutions, is surveying the state's building officials to assess their current electronic permitting capacities and needs.

To answer questions and discuss the process, Willamette Consulting has set up regional informational meetings and invited local building department personnel to attend. The results of this survey and regional follow-up meetings will help the consultant understand the needs of each building department relating to this e-permitting project.
