Terry,

Local 290 will be providing Certification Training for Medical Gas Inspectors beginning the last week in June and continuing through July, 2001. We will provide five 3-day classes for new medical gas inspectors and one 2-day update class for currently certified inspectors.

The classes will be taught by P.I.P.E and will include a lecture on NFPA 99-C as well as practical demonstration of typical medical gas systems using the P.I.P.E. med gas trailer. A certification exam will be given on the afternoon of the third day. Those participants successfully completing the exam will receive the P.I.P.E. Medical Gas Inspector Certification.

Local 290 Training Center will be providing this training for the nominal tuition fee of \$25.00 per person. Each person attending will be expected to possess a copy of the current NFPA 99-C. Local 290 will offer the NFPA 99-C for sale at a cost of \$25.00. Inspectors desiring to purchase a copy from Local 290 should notify us at time of registration.

The training sessions will be held at the following Local 290 training centers throughout Oregon. We are hopeful this schedule will meet the needs of inspectors throughout the state. Inspectors wishing to enroll may contact the Local 290 Training Center at 20220 SW Teton, Tualatin, OR 97062-8810 - Ph: (503) 691-1997. Payment may be made in advance or made on the first day of class. Checks should be made payable to Local 290 Training Center.
