Re: Electrical Permit Fees Increase

Effective September 4, 2001, the Building Codes Division is proposing to increase fees for electrical permits by 25%. This increase applies to only those permits issued by the Building Codes Division in the jurisdictions it serves. This fee increase will include hourly charges for electrical plan reviews and inspections, including those inspections performed under prefabricated structures and the Master Electrical Permit programs, and the electrical minor label sheets. This increase was included in the Legislatively-approved 2001-2003 budget, and is necessary in order to maintain current service levels and program solvency.

If you have any questions or concerns, please contact me. Thank you for your understanding on this matter

Sincerely,

James M. Hanson  
Field Operations Manager
